

JUNIATA COLLEGE BULLETIN

APRIL 1971

The new educational program

EDITORIAL

What is the goal of higher education? The liberal arts educator might answer that it is to enable each student to understand the world and to employ his talents effectively in it; to discover who he is and what his interests and abilities are; and to have a sense of responsibility about himself and the direction of his life.

Juniata College intends to meet this obligation through the structure of its new educational program and by promoting diversity and encouraging flexibility. For the student this means both freedom and continuity; the

freedom to explore interests and talents, and continuity based on a standard of excellence.

The faculty is the resource upon which the Trustees, the President, and his administration, as well as the students depend. All institutional efforts are designed to support a faculty composed of the finest teachers and scholars available. While the standard of excellence is the essence of the educational process, the commitment to academic freedom inevitably involves change, guided and implemented by the faculty, and supported by alumni, friends and the society at large.

A new chapter opens

Dr. Norris '54 is a busy executive. Few people appreciate the amount of paper work or the schedule of daily meetings handled by the dean of academic affairs.

Dr. Wilfred Norris appointed Dean of Academic Affairs

In the decade of the 1970's a new chapter in the history of Juniata College is being written. There are two recent events which point to the tone and style we may expect in the future as well as to the content and quality of the educational program. The first is the faculty vote approving the recommendations of the Task Force and the second, and most recent, is the appointment of Dr. Wilfred G. Norris '54 as dean of academic affairs.

At a time when higher education is under critical assessment and colleges and universities are being urged to review their aims and objectives, the

Juniata faculty voted to accept a far-reaching change in the curriculum and calendar while holding firmly to its traditional liberal arts philosophy. Coincidentally the search for an academic dean to fulfill the leadership role demanded by the new program focused with inexorable logic on the acting dean of academic affairs, former Task Force chairman, Juniata alumnus and professor, Dr. Norris.

President John N. Stauffer, in his announcement, said that over 130 names of persons who were either nominees or applicants, or both, had been studied and "the faculty-student

Miss Marjorie Johnston, assistant to the dean of academic affairs, as seen from Dr. Norris's office.

advisory committee and I examined all the papers submitted and came readily to the conclusion that the best man available is Dr. Norris."

"It is important," the President said, "that having served as chairman of the Task Force on the Juniata educational program, he is now in the best possible position to engage with wisdom and enthusiasm in the implementation of the program recently approved by the faculty."

He pointed out that Dr. Norris is a young man and assumes the responsibilities of academic dean at a time when all previous explanations and goals of the College are being questioned. In the academic area he will

work with students and faculty to make the institution reflect the needs of the decade in the context of a learning community dedicated to the liberal arts tradition.

It is not surprising to those who know him that Dr. Norris continues to teach and intends to do so in the future. He joined the Juniata faculty in 1958 following the completion of his advanced studies at the University of Tuebingen in Germany and at Harvard University. His Ph.D. was received from Harvard in 1963 and his B.S. (summa cum laude) from Juniata in 1954.

President Stauffer noted that "Dr. Norris has served with distinction in a number of leadership roles, including the chairmanship of the department of physics and also on a number of significant faculty and campus-wide committees. In 1966-67 he was president of the Central Pennsylvania section of the American Association of Physics Teachers."

"We are convinced," Dr. Stauffer said, "that Dr. Norris is the best person for the job. He has proven himself already as an able, energetic and imaginative leader, one who can help us achieve academic advance and reform. He is a young man and in that too he meets an important criterion. We see him as bringing all of the following important qualifications to the deanship: a good mind; scholarly attainment; dedication to liberal learning and to Juniata College; experience as a teacher; broad cultural and intellectual interests; sympathetic concern for all academic departments and for balance in the Juniata curriculum; and the courage of his convictions."

What is the educational structure which Dean Norris helped to fashion? What are the aims of the new program? How does the curriculum work? These and a host of other questions are being asked by alumni about the Juniata educational program. The answers are not all complete since the faculty, after months of study, is currently revising all courses in the light of the innovative aspects of the pro-

gram. The curriculum outline, however, is clear and the calendar for next year 1971-1972 is prepared.

Philosophy of education

Dean Norris is providing leadership in a situation which includes the outside world as well as the world of the Juniata campus. Neither he nor anyone else in an administrative position can ignore the continued signs of student unrest, financial instability and public antagonism to all academic institutions, both public and private. Higher education has become highly introspective with the inevitable result that changes are taking place on many campuses in response to the new situation in American society.

President Stauffer recognized the challenge to the educational programs and goals of Juniata very early and within a year of his arrival in 1968, organized a Task Force to re-examine the aims, purpose and curriculum of the College. It was, as the President said, an opportunity for a serious review and study of how Juniata, without breaking with its own traditions, could play a significant role in service to mankind.

The Task Force, under the leadership of Dr. Norris, and following his appointment as acting dean, under Mrs. Elizabeth Ann Cherry, assistant professor of humanities, hammered out a basic philosophy of education and constructed a new curriculum and academic calendar.

The key to the proposals may be found in the first sentences of the report which was submitted to the faculty in September, 1970:

"To be human is to be reflective, interpretative, and decision making. A liberal arts institution dedicates itself to this assumption and, further, claims that these habits of mind are capable of being cultivated and developed so that a man may become more fully human, to the benefit of both himself and the world in which he lives."

The report responded to the well

publicized crisis in higher education when it stated, "We have been led to believe that in education resides the only hope for the survival of the world. In 1970 we have been made to see that hope, even at Juniata, is gravely threatened. The world intrudes on our campus and we are forced to recognize that there is something beyond our departments and divisions which includes us all. Call it reality: call it life. It is history and psychology and political science and education and philosophy and natural science all at once, and unless we believe that, and learn to teach as though we believe it, we fail to enable our students to interpret intelligently the turmoil in their minds and lives."

Report summarized

The Task Force concluded its introductory comments by summarizing its position on higher education as follows:

- (1) We believe in the uniqueness of every mind and cherish the need of every man to come to know his own mind.
- (2) We trust in the individual's capacity to gauge his own abilities and interests and to choose, after an orientation to the areas open to him, those which he feels to be of most interest and value to him.
- (3) We admit that in our time one must specialize, because there is simply too much to know. But we also believe one should be acquainted with other approaches to knowledge.

The new educational program at Juniata is based on the assumption that a liberal education at the college level should attempt to prepare students to exercise mature judgment and to accept responsibility for their thoughts and actions.

Innovative curriculum

The curriculum which will go into effect in September offers students an increased measure of both freedom and responsibility to help them gain confidence and wisdom by means of the greater freedom and responsibility. Perhaps most important of all, the curriculum promises students more access to, as well as more concerned advising from, faculty members.

The freshman class, entering Juniata in September, will be the first to do their undergraduate work under the new curriculum. The present undergraduates—those who are currently freshmen, sophomores and juniors—will continue to work with the former curriculum. Recently, however, the faculty voted to allow these students to develop a "program of emphasis" similar to that of the new curriculum.

The present classes will—at least for next year—stay on the former

semester calendar although the freshmen are under the new three term calendar. As a result of the faculty action, however, upperclassmen may enjoy the benefits of the more innovative curriculum by appealing to the Curriculum Committee for permission to build a personal area of study.

The freshmen entering in September will have the following calendar: the first term will begin on September 13 and continue until November 23; the second term will begin November 29 and close on February 22; and the third term will start March 6 and finish May 25.

The new calendar of three ten-week terms permits a great deal of flexibility. The faculty may create courses of five, ten, fifteen, twenty or more weeks. For example, a special off-campus project may demand completion in five weeks while a research project could be pursued over 20 or even 30 weeks if the professor thought it desirable.

A meeting of the Task Force members with the Juniata Alumni Council in 1969.

A brief description

UNITS

Units are the basic measure of work. They may occupy five, ten, fifteen or twenty week periods. A normal student load is three units per term. Thirty-four units are needed to graduate.

PROGRAM OF EMPHASIS

The Program of Emphasis consists of 15 units of related studies. It is conceived by the student in consultation with two advisers. A written rationale by the student is required for the original program and for subsequent changes.

GENERAL EDUCATION

General Education requirements are six units after the first term of the freshman year: two units from the four or five units offered by *Human Existence—Historical*; two units of *Human Existence—Analytical*; and two units from other general education courses listed in the catalogue.

The calendar, curriculum, courses of study—in short, the whole new educational program, is based on the belief that all human beings are, as was

FRESHMAN YEAR PROGRAM		
<i>Learning units — three per term</i>		
10 WEEKS	10 WEEKS	10 WEEKS
MODES OF THOUGHT AND METHODS OF INQUIRY (2 units)	ELECTIVE (1 unit)	ELECTIVE (1 unit)
	HUMAN EXISTENCE HISTORICAL OR AN ELECTIVE (1 unit)	HUMAN EXISTENCE HISTORICAL OR AN ELECTIVE (1 unit)
WRITING PROGRAM (1 unit)		ELECTIVE (1 unit) OR REMEDIAL WRITING (0 unit)
INTRODUCTORY SEMINAR (1 unit)		

said above, to some degree reflective, interpretative, and decision making. How does the Task Force explain its program? How does a teacher help a student become *reflective*?

One way is to help each man or woman examine the recurring questions of man: Who is man? Who am I? Is there a God? These questions have been repeatedly asked and various answers given. In all disciplines, as well, there remains the unknowable.

In a student's confrontation with the unknowable he reflects on not only his discipline, but also on the human condition. In the new curriculum there are six units devoted explicitly to this concern required of each student.

Urging a student to be *interpretative* is a long standing faculty plea, but it is felt that the student too often lacks a context, or perspective, within which to interpret his material. The

Graduation marks the end of undergraduate study. President Stauffer hands Bruce Bader '70 his diploma as Dr. Donald Rockwell, former dean of academic affairs, prepares to announce the next candidate.

only valid context for today is "the whole," the total picture, all aspects of life, all disciplines of the College. As unrealistic as this may seem, the attempt must be made in order to avoid either superficiality or cries of irrelevance on the part of the student. An initial immersion in an experience designed to provide some such context is *Modes of Thought and Methods of Inquiry*; later the student has an opportunity in his *Program Review* to put it all together for himself.

There seems to be no better way to help a student to become *decision-making* than by asking him to make decisions and to assume responsibility for them. He should be aware of alternatives and consequences. In the new curriculum he will have the responsibility, in the light of his own goals and with the help of faculty advisers, to develop a Program of Emphasis with a written statement giving the rationale for his choice. Departments and faculty will suggest, offer alternatives, give advice, but the final choice must be the student's—his decision, his responsibility.

The ratio of faculty to students at Juniata is approximately 11 to 1.

For years the presence of an umbrella indicated the presence of a faculty member. This is not always a true indicator today, however.

The former and the present curriculum compared

The All College requirements:

OLD: A major plus collateral and distribution (after 1960)

A major plus Arts and Humanities, Mind, Nature of Society, Nature of Science and follow-up courses to these plus some distribution (before 1960) Physical Education, Language, English Conference, Religion, Ethics and (after 1960) Great Epochs, Integration and no Ethics.

NEW: A Program of Emphasis (15 units)

General Education (6 units)

Writing Program (1 unit)

Introductory Seminar (1 unit)

Modes of Thought and Methods of Inquiry (2 units)

OLD: 120 credit hours, usually 40 courses

NEW: 34 units

Breadth, Depth and General Education:

OLD: Depth: The area of concentration, the major

Breadth: Freshman Courses and follow-up: (before 1960), distribution, and Great Epochs and Integration (after 1960).

NEW: Depth: Program of Emphasis

Breadth: It is now equated with an awareness of "the whole" and an explicit confrontation with specific questions of human experience. Nine of the ten required units for graduation, other than the Program of Emphasis, are viewed as General Education.

The Program of Emphasis

OLD: Requirements for a major were laid down by a department with varying degrees of flexibility. For example, History had very few required courses while pre-med had many.

NEW: The goal chosen by a student with the help of his faculty advisers will dictate the Program of Emphasis. In its role of certification, the college degree will now be available not only to those students who wish a pre-professional or graduate

school preparation, but also to those students who wish an unconventional grouping of units meeting their personal intellectual needs. The Program of Emphasis meets the requirements of those who know exactly what career they wish to follow as well as those with less well defined goals. An increasing number of students are in the latter category.

The calendar change:

OLD: Two fifteen-week semesters, fifteen credit hours, five courses were a normal load.

NEW: Three ten-week terms, three units are a normal load. With various combinations of five-week modules possible in addition to the ten-week term, much greater flexibility is available for structuring the content of a unit. In addition the student will be engaged in fewer areas at one time and his efforts will be less fragmented.

Registration of students for a new term takes place in the Women's Gymnasium.

Units compared to courses:

OLD: A course was equal to 3 or 4 credit hours. Thus a credit hour became the basis of measurement. A course was talked of in terms of hours spent in the classroom or laboratory.

NEW: A unit is determined by the nature of the material or problem under study, not by the numbers of hours spent in the classroom or laboratory. For a traditional lecture unit, a suggested format is an hour a day, five days a week, but for units taught in other ways, all kinds of arrangements are possible. In those cases where one of the present upperclassmen takes a unit, it will be recorded as 3.53 credit hours.

The Writing Program compared to English Conference Program:

OLD: No credit. Competency required prior to the junior year. Taught by a special staff and administered by a faculty member.

NEW: One unit of credit when competency is obtained. Competency is required by the end of the freshman year. Remedial work is available in the third term. The Writing Program is taught by a trained staff and is directed by a faculty member. Close cooperation with "Modes of Thought and Methods of Inquiry" and "Human Existence—Historical" helps the student to write and think clearly.

What is the purpose of the Freshman Seminar?

NEW: There are two reasons for the grouping of twelve or fifteen freshmen with a faculty member in the study of a problem of common interest. First is the necessity for a student, as early in his college career as possible, to get to know a faculty member as an individual and as a scholar. It is the proximity of faculty and students which a small college must exploit.

Secondly, the essential role of faculty, in the task of advising students in a curriculum where the undergraduate has increased freedom to build his own Program, makes necessary a high degree of understanding between the student and his advisers. The Seminar is designed to facilitate this understanding.

A view from inside Ellis Hall, the location of the College Center, looking toward Leshner Hall, a women's residence.

In conclusion

Is there a break with the liberal arts tradition? The firm and considered answer must be no! The previous system for organizing education around a particular discipline is changed, but the centuries old view of the importance of a liberal education has not changed at all.

Cardinal Newman declared over a century ago, "The principle of real dignity in knowledge, its worth, its desirableness, considered irrespectively of its results, is this germ within it of a scientific or a philosophical process. This is how it comes to be an end in itself; this is why it admits of being called Liberal."

"Not to know," the Cardinal continued, "the relative disposition of things is the state of slaves or children; to have mapped out the Universe is the boast, or at least the ambition of philosophy."

"Education," he concluded, "is a habit, a personal possession, and an inward endowment." A university or a college, he wrote is not a place of "instruction, but of education."

Wishing wells and New Year's resolutions

by Jonathan Hunter '72

All of us make wishes, have high hopes at one time or another; now it's Juniata's turn. The passage of the Task Force proposal set up a lot of high hopes for Juniata's future. What's my reaction? Basically, a lot of mixed emotions.

I have supported the proposal from the first time that I read it. I think the whole report was a very commendable effort by many very perceptive people. Much of the analysis of the situation at the College, both social and curricular, paralleled many of the thoughts and criticisms that I have entertained about Juniata in the three years that I have been here. Juniata at present offers a fairly good education for the student willing to apply himself and get involved in pursuing actively his academic career. Unfortunately for most students, the quality of the education they received here has been, in the last several years, little different to that offered at most State institutions. I think the fault for this lies with both the students who attend Juniata and the system that has existed here.

The average student at Juniata differs little, in outlook or goals, from his fellows. This causes the unfortunate lack of cultural and intellectual stimulation to reach beyond the level of insights where he is presently; there is no encouragement to look seriously at other life styles. Also, there appears to me to be a serious lack in seriously intellectually oriented students on this campus. I think it is a fair judgment that a large majority of the students at Juniata are caught up in the classical "get a degree to get a better job" syndrome. Few are seriously interested in pursuing their education. There is nothing wrong, with wanting a better job; however, when the interest level of students is predominantly socially oriented, you have little chance to develop a sincere intellectual community. One side effect I notice is that students take little chance to capitalize on the main advantage of the small college, the opportunity to develop

closer relationships with your professors. When there is no rapport between students and faculty, students tend to mistrust faculty and faculty tends to look at students as "merely" students.

One explanation of Juniata's one "type" (I use the word as a true liberal, tongue in cheek) of student is the system or curriculum we have had. As stated, the skeletal structure of the curriculum is little different from a State school, and why would it attract the more intellectually oriented student? Especially considering the cost factor. Another problem is Juniata's isolation from the "real world." Juniata has too often attempted to bring "culture" in rather than working on getting the students out into field trips and other participation activities. To me, the proximity of Broadway and the possibility of a bus would suggest real educational possibilities for such a field as Theater Arts.

Will the Task Force Curriculum, or rather I should say, Juniata's curriculum, provide a solution to this problem? Or is it another New Year's resolution? I propose that the main determinant will be the attitude in which the restructuring will take place. Unless we do more than sit and wish, we'll be in a worse rut than we started in. The faculty has the toughest job, they must do more than re-name courses, they must make a serious attempt at redesigning the educational experience to make a more dynamic process than it has been in past years. I rather imagine that this whole reformulation of approach will tend to attract the more seriously intellectual student which will be necessary to provide the complement to a dedicated faculty which makes serious, *active* attempts at developing a little more rapport with the students.

In my opinion, the new curriculum will make no difference in the education received by my class, the die has already been cast, it will make little difference to this year's sophomores and not much more to this year's

STUDENT COMMENT

Jonathan C. Hunter '72

freshmen. It will be worthwhile if it can offer a lot of difference to the classes that begin their trek through education land next year and in the following years.

What difference? In today's world the only justification for a small college like Juniata, and the only thing that will keep it alive amidst rising costs, is if it can provide a truly unique educational experience. I think the new curriculum can be the proper vehicle to bring about that kind of dynamic education. I suppose we just have to be willing to throw a few more hours and a little more concern into the Wishing Well. Here's hoping.

JONATHAN C. HUNTER '72 is a junior from Modesto, California and is the son of the Rev. and Mrs. John W. Hunter. He is majoring in political science and is a student representative on the Juniata College Board of Trustees.

A shift in educational responsibility

by Dr. Russell A. Hill '55

ALUMNI COMMENT

Congratulations to the faculty of Juniata College! The recent changes in the academic program, ranging from a fundamental shift in educational philosophy to a change in matriculation mathematics, are highly significant for the future of the College. Moreover, these changes seem to have been wrought in full consultation with students, administration, and yes . . . alumni. Congratulations and thanks are due.

To an outside observer, the key change seems to be a shift of educational responsibility from the faculty to the students. In the past, the faculty designed the programs and presented them to the students. The students strove to meet the faculty demands. If they tested successfully, they passed. Under the new plan, students can assume responsibility for designing and pursuing their own programs. Students can assemble programs of courses and can propose independent study. They can choose to become full partners in their own education. Such a partnership is worth attaining.

Educational research suggests that a shift in responsibility to the learner will result in four kinds of payoff to the college community.

1. *Student motivation will be enhanced.* Engaging the learner in planning his learning activities and in setting his learning goals engenders commitment and responsibility for carrying through these same activities to fruition. The student becomes actively engaged. (Sorenson, et al. 1970) (Kolb, et al. 1968) (Winter, et al. 1967) (McClelland, et al. 1953) (McClelland, 1963a) (McClelland, 1965c) (Atkinson and Raphaelson, 1956).
2. *Student achievement will be enhanced.* Educational research suggests that students will achieve more if they are involved. (McGhee and Crandall, 1968) (Lefcourt, 1966) (Kolb, et al. 1968) (Battle, 1966) (deCharms, et al. 1969) (Mehta, 1966).

3. *Student morale will be enhanced.* Learners who participate as partners feel better about their schooling. Their attitudes are more positive toward faculty, peers and the institution. They feel less alienated. (Lefcourt, 1966) (Kolb, et al. 1968) (McClelland, 1963a) (Eklund, 1957).
4. *Student self-direction will be enhanced.* Research suggests that there is a carry-over in attitudes about self and in patterns of taking responsibility for self-direction that extend beyond the immediate situation. The learner not only learns the academic content, he learns the skills of engaging in purposive action. (Sorenson, et al. 1970) (Alschuler, et al. 1970) (Pierce, 1959) (Veroff, 1967) (McClelland, 1963a) (Aronoff and Litwin, 1966) (Gaa, 1970).

To be sure, the research findings in these areas are just beginning to accumulate. But their weight is clearly positive. Taken together, they make it plain that the proposed changes are

well worth their effort. The potential payoff is great.

The task of shifting the responsibility from the professor to the student is not easy. Both professor and student must learn a new set of attitudes and skills. The process is somewhat akin to contracting. There are two equal parties. Either can propose. The professor has the power to grant a unit of work. The student can earn it. They meet together to negotiate academic product for unit credit. This process is subtle, personal, and time consuming. It requires patience, good will and skill . . . all of which are expensive and in short supply in most college communities.

The key point in the proposed plans seems to be the freshman seminar. Here the newcomer learns an attitude and a way of acting in the academic program. He receives information about graduate school requirements and course programs. He examines his own interests and concerns. He considers models of the educated man and models for intelligent and purposive action. Finally, he sets personal, academic goals for himself. The seminar carries a heavy burden. It will require talented, skillful teaching to be successful.

There seems to be a good beginning. Deliberations have predictably left factions in their wake. But, demures have been heard and the course is set. Faculty and students must begin to work together to build courses, advisement conventions, and programs that are economical in administrative effort but still maintain freedom, flexibility, and personal individuality. This will require years of quiet, unheralded work. The next three years will be crucial in the implementation of the changes.

What does this mean to the alumni? Frankly, it means that Juniata needs more money to do a worthwhile job. Perhaps our slogan should be "It's worth it to dig deeper." The faculty seeks to build an outstanding educational program—one in which we can have confidence—one in which we

Dr. Russell A. Hill '55

In the liberal arts tradition

by Dr. Howard P. Angstadt '57

can find pride. Individualization of programs and courses requires more faculty time. Indeed, it requires more of the most talented faculty's time.

Faculty time equals money. Thus, support for the general operating expenses of the College will be important in the immediate three years. You can support and participate in the educational changes at Juniata by making contributions directly to the Annual Support Fund. Think about it.

Again, congratulations to the faculty. There was a time when Juniata was much smaller. It was then appropriate for the College to function as a unit. Now with a change in size, a change in administration, and a change in cultural expectations, it is appropriate that the faculty should assume vigorous and thoughtful leadership of the educational programs; leadership which consults with all those interested, yet leadership which is firm in bringing the process of deliberation to a point of productive closure. This seems to have been done. Congratulations for a worthwhile task well begun.

DR. RUSSELL A. HILL '55 is a Research Fellow with Research for Better Schools, Inc., Philadelphia, Pa. In 1969 he was appointed Assistant Dean for Education Research and Development at Temple University where he earned his Ed.D. in 1963 and was also an associate professor in the College of Education. He served as an alumni adviser to the Task Force and is past president of the National Alumni Association.

Dr. Howard P. Angstadt '57

With the acceptance by the faculty of the recommendations for curriculum revision of the Task Force, Juniata College experienced the first major change in educational format in over three decades. The key elements of this new curriculum appear to be a considerably greater latitude for the student to design his own educational program and an increased reliance upon the faculty to provide adequate counsel and instruction, especially during the freshman year, in order to provide the student with a sound basis for selecting his program of studies. As expected in these situations, most of the literature concerning the new curriculum for Juniata College focuses upon the differences between the old and the new. I should like to pause for a moment and consider in what respects the former more rigidly structured educational program and the new curriculum are similar.

Following in the true liberal art tradition the new program provides for a broad exposure to human development in the early stages of the student's academic career by means of the "Human Existence" and "Modes of Thought and Methods of Inquiry"

The chemistry laboratory in the Brumbaugh Science Center.

sequence. Apart from analytical overtones, it appears that this resembles the prior program which required introductory courses in the arts, humanities, and history during the freshman year. The 15 curricular units described as the "Program of Emphasis" bears a striking similarity to the older "required" courses which constituted a student's "major." The component known as "General Studies" and all the remaining units in an individual's program might be compared with the "electives" that were available under the former curriculum. So it seems that in critical areas there is a more than accidental concurrence between the old and the new curricula. And this is understandable since there are basic features which constitute a liberal arts education (see J. C. Alumni Bulletin, Spring 1970), and we should expect certain similarities between any curricula which purport to educate in the liberal arts regardless of the titles affixed to these components.

With regard to what is different about this new program of studies, a particularly enticing feature to me is the element of student involvement in designing and, most importantly, justifying his personal program of studies. With considerable foresight, the Task Force recommended, however, that before undertaking such a responsibility the student be thoroughly exposed to the vast realm of human experience already available for study. Even then, the student is not cut adrift to formulate his program, but does so with the cooperation and guidance of the community's most learned men; namely the faculty. We are told that each program must be "justified" in writing by the student and accepted by a Program Committee. If it does no more than force each student to consider the reason for his taking each specific course and how each course relates to his whole program, the "justification" procedure will be amply justified. No longer should the chronic student lament be heard: "Why do I have to take that course?"

The written justification and Pro-

gram Committee approval technique has several built-in implications. For example, each student should be committed to the idea that it is to his own advantage to plan, defend and complete a curriculum designed by and for him. My experience indicates that not all college freshmen are ready for this responsibility, and therefore the task of bringing the student to this point of maturation near the end of his freshman year falls to the faculty. I expect that "canned" programs may appear, and it is my belief that to the extent the new curriculum allows "canned" Programs of Emphasis to evolve its effectiveness will be reduced, student justifications not withstanding.

A second implication of a curriculum which involves student designed and defended programs which are then committee approved is a vastly increased faculty interaction with students. Throughout the entire Proposal which the faculty accepted there runs the theme of faculty-student encounter. Presumably these interactions will result in a meaningful exchange of information, the very essence of teaching. Hence, if I had to single out one single requirement for the success of the new curriculum it would be that of almost total faculty commitment to the tenets of the Proposal they accepted.

The student who has well formulated objectives will require a minimum of advice, but these people still most likely represent a minority of the total student population. The individual who has yet to find himself and expects to do so in college will require extensive, effective and periodic counsel in order to make his program meaningful to him. And this will require a great deal of non-classroom faculty time. The faculty vote on the Task Force proposals causes me some concern in as much as about one third of the total faculty voted to reject these proposals. While a NO vote does not necessarily indicate complete disagreement with the proposals, neither does a YES indicate complete agree-

ment. Since the faculty did accept the recommendations of the Task Force and a new curriculum is now, or will be shortly, a fact, I hope that regardless of the reasons faculty members voted against acceptance of the Task Force proposals, the total faculty will now commit themselves to making the new curriculum a truly effective educational experience. Furthermore, since the new curriculum stresses heavily the teaching aspects of a faculty member's obligations it is essential that outstanding performance of this function be adequately recognized both administratively and by ones peers. This has not been the case in higher education in the recent past.

The revision of a curriculum is indeed an awesome responsibility. The Task Force accepted this challenge and discharged it admirably. The entire college community is now challenged to carry out the new proposals, maintaining the objectivity and flexibility to modify, adapt, or reject specific recommendations when and if they do not work. Theoretically, I believe the new curriculum has great promise, but it remains to be seen whether that promise can be realized.

HOWARD P. ANGSTADT '57

DR. HOWARD ANGSTADT '57 is a research chemist with the Sun Oil Company. His Ph.D. was earned at Purdue University. He is married to Dr. Carol Newborg Angstadt '57, assistant professor at Hahnemann Medical College. He served as an adviser to the Task Force.

PEOPLE WE KNOW

by Nan Hunt '56

The Little Indians

Christopher Robert was born December 14, 1970, to Mr. and Mrs. ROBERT GOMPERTS '69.

Andrew Benjamin was born December 16, 1970, to STEVE '67 and MARET (PIRAND) '68 HERR.

Kristi Dawn was born December 20, 1970, to Kenneth and EDITH ANN (RITCHEY) '68 COOPER.

Meta Katri was born November 27, 1970, to GEORGE '67 and LORRAINE (SHOENTHAL) '68 ESPY.

Christopher Robinson was born August 29, 1970, to Carl and PENNEY (ROBINSON) '65 BUSH.

Karen Marie was born March 11, 1971, to the Rev. J. D. and PEGGY (ROBINSON) '63 GLICK.

Carolyn was born December 2, 1970, to Mr. and Mrs. JAMES COPENHEAVER '60.

Andrew Albert was born October 28, 1970, to Al and JACKIE (RHODES) '59 LUTZ.

Brett Jermaine was born July 17, 1970, to JOEL '59 and BONNIE (GUNTHER) '59 RIEGEL.

Samuel John was born December 21, 1970, to Manuel and BEVERLY (RINEHART) '59 DARKATSH.

Amanda Aileen was born February 5, 1971, to BOB '58 and MARY (SHIRK) '59 READER.

John Alexander was born January 16, 1971, to David and JANE (BUTTS) '58 KILGORE.

David Jesse was born October 23, 1970, to Harry and BETTY (SHEARER) '54 OKESON.

70

BARBARA WOY, daughter of Mr. and Mrs. ROBERT WOY '43 of Johnstown, Pa., was married to Raymond FULLER on January 30, 1971. Barbara is teaching first grade at the Jerome Elementary School while her husband completes his studies at California State College. He is currently student teaching at Latrobe Area Senior High School. The couple is living at Box 113, Jenners-town, Pa.

Ensign PATRICK TYSON received a commission in the Naval Reserve upon his graduation from the Naval Aviation Officer Candidate School at Pensacola, Fla.

Two members of this class wrote in to report on their Peace Corps activities. WARREN SCOTT JR. will be in India for two years

in his work. He recently married Shirlee Rostron and their address is c/o American Peace Corps, Humnabad, Bidar Dist., Mysore State, India. MARY SCHMOYER is teaching science to elementary pupils in Silay City, Philippines in her Peace Corps position.

JOHN OVER is involved in field engineering of highway construction. He is living at 913 Bloomfield St., Roaring Springs, Pa. 16673.

Lots of teachers reported in to our office. Two mathematics instructors were heard from—ADAM BARNHART and RONALD HENGST. Adam is teaching in Annville where his address is 305 S. White Oak, Annville, Pa. 17003. Ron is living at 10 Coach Ln., Exton, Pa. 19341.

A secondary school teacher in Huntingdon is ELMER E. CLYMER III. His address is 1502 Washington St., 16652. From Panama City, Fla., MARY ELLEN VOGT writes that she is teaching reading at a Sixth Grade Center. Her address is 1212 Ethlyn Rd., Bayou View, 5, 32401.

EDWARD and INA '69 (WAREHAM) PECK, JR., are living at 4301 Spruce St., Apt. 203-B, Philadelphia, Pa. 19104, where Ina is working for the Colonial Penn Life Insurance Co., while Ed studies to prepare for Holy Orders in the Episcopal Church at Philadelphia Divinity School.

DANIEL HOOVER is operations analyst for Celanese Fibers Co. and is living at 941 Bishop Walsh Rd. in Cumberland, Md. 21502.

Added to the Daily News staff in Huntingdon is another Juniata, RON SHAFER. Ron's home address is 328 Penn St., Huntingdon, Pa. 16652.

Airman JEFFREY HAUBER has completed his basic training at Lackland AFB in Texas and has been assigned to Lowry AFB in Colorado, for training in the supply field.

69

Victoria DelBaggio and JOHN R. HAYES were married in November in Tyrone, where they are both teachers at Tyrone Area High School. The couple's address is 1011 Lincoln Ave., Tyrone, Pa. 16686.

KATHY WIGGINS is an advertising copywriter for Edmund Scientific Co., but still finds time to play a role in the Merchantville Playcrafter's latest production, "Take Her, She's Mine." Kathy is living at 120 Mansfield Blvd., S., Cherry Hill, N. J. 08034.

In addition to the announcement of a new baby (see The Little Indians), BOB GOMPERTS reports that they have moved from Connecticut to 3619 E. 1st St., Apt. 1, Long Beach, Calif. 90803.

"Exciting" is the word LARRY and BETSY (SUPLIKI) CASPER use to describe their life in Fairbanks, Alaska. Larry recently resigned his job with the Federal Water Quality Administration to accept a position with the University of Alaska, where he is now working as a research chemist with the Institute of Water Resources. His main task is to run the laboratories for the Institute and assist investigators in a variety of projects, although he added that he has already begun some work on his own in the field of oil pollution. The Caspers' temporary address is c/o Institute of Water Resources, University of Alaska College, Alas. 99701.

68

DAVID LEE KERSTETTER was wed to Marcella Grace Yoder, a staff nurse at Harrisburg Polyclinic Hospital, last August. The couple is living in Hershey, Pa., where Dave is a medical student at the Milton S. Hershey Medical School.

EDITH ANN RITCHEY COOPER and husband Kenneth, a '67 Penn State grad, are living at

Box 335G, R. D. 1, Halifax, Pa. 17032. Edith Ann taught third grade for two years before becoming housewife and mother (see Little Indians) and Ken is an electrical technician for Pennsylvania Power and Light Co.

Another "Little Indian" was added to the population by the HERRS, STEVE '67 and MARET (PURAND) who are currently out in Iowa. Maret received her bachelor degree at the University of Iowa and Steve just received his M.S. in geology there. A portion of his thesis will be published this year in the Journal of Paleontology. In September 1971, Steve will be finished with his alternative service at the University of Iowa hospitals, after which he plans to begin a doctoral program in geology. Steve comments for the many who will want to order multiple baby pictures, they can write to 509 Finkbine Pk., Iowa City, Iowa 52240.

SANDRA BOOSE COMBS, a First Lt. in the U. S. Air Force, wrote recently to report that she was married to Allen Combs, a flight surgeon, in August 1969. Her husband is currently assigned to Phan Rang Air Base in Vietnam, and on May 1, Sandy will be at Cam Ranh Bay, Vietnam, for a year. After these assignments are over, the couple hopes to be living at Newport News, Va., where Allen will have a private practice. In the meantime, however, both Sandy and her husband are enthused members of the Air Force. Sandy has traveled to Germany, England, Greece, Italy and Spain since joining the service and is now excitedly anticipating her tour in Vietnam. Her address is 483 Combat Support Group, APO San Francisco, 96326, and after September, address it to Captain Combs!

DONALD HOOVER recently returned from his BVS assignment as a teacher in Nigeria. He is presently attending Bethany Theological Seminary.

67

ALAN RINGGOLD writes that he has been appointed as a Special Agent with the Federal Bureau of Investigation and is currently attending training in Washington, D.C. Although located in Alexandria, Va., when he wrote, Alan expected to be sent elsewhere at the completion of training school.

A second award of the Army commendation medal was given to Doctor (Captain) RONALD BLANCK during his last assignment with the walk-in-clinic, Andrew Rader U. S. Army Clinic at Ft. Myer, Va. This was his second award while serving with Walter Reed General Hospital. He also holds the Bronze Star Medal and Army Commendation Medal for heroism.

Jackie Keyser and GRANT CROYLE were married October 10 of last year. Grant is

teaching at Westmont Hilltop Junior High School and the couple is living at 800 Luzerne St., Johnstown, Pa.

The Pennsylvania State University awarded two advanced degrees to members of this class. CHRISTINE JOANN BAILEY received a master of arts degree and WILLIAM BRAGONIER was awarded a master of science degree.

66

Since September '69, HELEN MCGINLEY has been the assistant editor in the home economic department of Ginn Publishing Co., in Boston. Prior to that she taught junior high home economics. Helen received her master's in home ec in May of '69. Her address is 37-7 Summer St., Waltham, Mass. 02154.

The University of Michigan's library science librarian is DORIS ASHER. Doris' address is Apt. 4, 715 Lawrence, Ann Arbor, Michigan 48104.

PENNEY BUSH writes that husband Carl is a first year resident at Bethesda Naval Hospital, where he is specializing in anesthesiology. Their address is 11900 Parklawn Pl., Rockville, Md. 20852. They also had "Little Indian" news!

ROSALITA LEONARD spoke in Statuary Hall in the Capitol in February as part of the meetings of the National Temperance and Prohibition Council. The service was held by the statue of Frances Willard, founder of the World WCTU and the only woman whose statue is in the rotunda. Rosalita's address is 1730 Chicago Ave., Evanston, Ill. 60201 and she is still the national general secretary of the Youth Temperance Council.

65

RICHARD ADAMS has been named supervisor in the claim department at the Harrisburg Casualty, a surety division office of Aetna Life & Casualty. He lives at 490 Sue Dr., Hummelstown, Pa.

37

The good news came from the HOOVERS that PAUL is back in his office again after being temporarily stopped from being a physician by a heart attack. His doctor gave him a daily prescription of a two mile walk every day for the rest of his life—good medicine for us all! M.E. '39, Paul, and children are living at 354 W. Main St., Windsor, Pa. 17366; however, daughter Linda spends most of her time on Juniata's campus as she is a junior there.

DOROTHY BECK is a fifth grade teacher in the Mt. Union Area Schools and her address is R. D. 2, McVeytown, Pa. 17051.

HAROLD R. SMITH died last November after a lengthy illness. In September prior to his death, he had completed thirty years service as a chemist for Edgewood Arsenal, Md.

36

Two rather large responsibilities are in the hands of DR. THOMAS R. MILLER in his position as vice president for Union Carbide Corporation. His one area of responsibility is the Union Carbide petroleum corporation, and the other is for new business development for the corporation.

The ROSENBERGER family, CLARENCE and IDA '34, reported on the news of their young Juniataans. BRUCE '63 and Mary Sue announced the addition of Luke in July and

a pastorate at Center Church, Louisville, Ohio, in June. JOYCE '67 has returned home from her three years of teaching in Nigeria and plans to go on to grad school. Bryan, a senior at Juniata, will be attending law school next fall. Clarence is pastor for the East Petersburg Church of the Brethren.

GENEVIEVE B. GLESSNER is teaching and her home address is Route 1, Berlin, Pa. 15530.

Chairman of the sociology and anthropology department at St. John's University is CHARLES E. FULLER. Also a member of the Human Relations Council in Freeport, Charles lives at 449 Roosevelt Ave., Freeport, N. Y. 11520.

35

Mrs. ELIZABETH WILSON GORMAN was awarded a master of education degree in counseling education at Indiana University's commencement exercises last August. Her research project was on the subject "A Descriptive Study Identifying Student Problems in the Upper Grades at Marion Center Area High School." She and her husband, Floyd, live at 405 N. 6th St., Indiana, Pa.

33

DR. CHAUNCEY HOFFMAN was honored as general practitioner of the year for 1970 by the Cambria County Medical Society. Dr. Hoffman's practice is in Windber, and his address is 800 Somerset Ave., Windber, Pa.

HALFRED WERTZ is executive director for the Green Valleys Association. His address is R. D. 2, Pottstown, Pa. 19464.

32

ALDEN CODER, professor of health and physical education at Montclair State College, was installed as president of the New Jersey Association of Health, Education and Recreation at the organization's recent annual banquet. He has also been active in the national chapter of this group, as well as holding various positions in the New Jersey branch. He is considered an authority on sports, medicine and driver education.

PAUL WEGLEY died January 18, 1971. His home had been at 1107 Confer Ave., in Johnstown, Pa.

31

JOHN CLAUDE SAYLOR died unexpectedly while teaching at Windber High School on February 10 of this year. He had been a physics and mathematics professor for 40 years.

M. RICHARD JACOBS is teaching and lives at 777 Southern Rd., York, Pa. 17403.

The husband of LILLIAN HARBAUGH SMOKE, Dr. Kenneth L. Smoke, died on December 21. He was chairman of the department of psychology at Gettysburg College. He had also served Juniata as Professor of psychology from 1932 until 1946, while his wife was acting librarian, teacher of

English, and assistant dean of women. Mrs. Smoke is now librarian at Gettysburg College.

30

CLIFFORD E. BAGLEY, M.D., is still practicing urology and genito-urinary surgery in Arlington, Va. He is also associate professor of clinical urology at Georgetown University School of Medicine in Washington, D. C. He enjoys life on his 200 acre farm in Nokesville, Va., where he enjoys fishing and raises Charolais cattle.

29

FLORENCE STUTZMAN COLL is teaching and living at 170 W. Lehman Ave., Hatboro, Pa. 19040. Her husband died three years ago. Her son and daughter are married with growing families.

RALPH BARNETT, retired superintendent of Somerset County schools, will serve as chairman for the Somerset County chapter of the Sons of the American Revolution.

After serving as dietitian in hospitals for many years, RUTH PRENTICE writes that she is now serving as a companion-dietitian for an individual in her home and is enjoying the change immensely. Ruth's address is 82 Elm St., Worcester, Mass. 01609.

28

A. KURTZ KING has retired from Pennsylvania Public School Service, but is still doing part-time duty as educational director for the Philadelphia Chapter of American Institute of Banking. His address is 4 Garfield Ave., Lansdale, Pa. 19446.

The retirement of WILLIAM MILLER from New Holland was announced recently. He is married to the former Margaret Russler and the couple has five daughters. They reside at 126 2nd St., Belleville, Pa.

25

From Clearville, Pa., comes word of BRUCE FISHER who is retired, but enjoys the hobbies of tree farming, conservation, hunting, fishing, travel and woodworking. His address is R. D. 2, Clearville, Pa. 15535.

ESTHER KULP CLARK writes that she has also retired and she is now living at 773 S. Keim St., Pottstown, Pa. 19464.

24

CARRIE B. SNYDER died November 20, 1970 after a number of years of failing health. She had been employed by Wilson Chemical Co., in Tyrone, but was forced to retire because of ill health after 35 years employment with the firm. Her brother, WILBUR O. SNYDER '23, a retired employee of Lewis and Thomas Saltz, Washington, D. C., survives, and is living at 1352 Blair Ave., Tyrone, Pa.

GRANT WEAVER died on January 2, 1971. He is survived by his wife Mrs. Lutie Weaver of Sebring, Fla.

22

ADA L. and MARY L. '23 CRISSMAN are both retired from teaching now. Their address is 529 Hickory St., Hollidaysburg, Pa. 16648.

DR. ELIZABETH BOYD has retired from the mathematics department of Stetson University as of last year and is now living at 727 N. Amelia Ave., DeLand, Fla. 32720.

19

LOIS HENDERSON of Petersburg, Pa., died February 10 of this year. She was a teacher for 43 years, 41 of them in Petersburg Schools.

18

Mrs. HELEN K. KENNEDY died last year after a lengthy illness.

VERDA SPANGLER BURNETT is retired from school secretarial work and her home is at 525 Maple St., E. Pittsburgh, Pa. 15112.

DR. GEORGE F. WHEELING, medical director at Windber Division of Johnstown's Memorial Hospital, was recently presented the All-Sports Gold Medal Award at the Cambria County War Memorial Sports Hall of Fame Banquet. A baseball player at Juniata, Dr. Wheeler was also interested in golf, winning five club championships at Sunnehanna Country Club. He inaugurated the Wheeling Invitational Scholastic Golf Tournament in 1960 and in the most recent one of these events, 22 schools competed. His interest in young athletes has been shown throughout the years and the award was a fitting one for such an outstanding sportsman.

16

EDITH WINEY BENNER is resident head of Stauffer Hall at Ursinus College. Her address is Stauffer Hall, Ursinus College, Collegeville, Pa. 19426.

15

Mrs. MARY BALENTINE died last fall at West Palm Beach. After leaving Juniata, she taught school in Pennsylvania and during World War I she assisted in the work of the Surgeon General's office.

RAYMOND RYDER is professor emeritus at Purdue University. His address is 703 Hayes St., West Lafayette, Ind. 47906.

12

JASPER T. SHRINER died on November 15, 1970.

00

Mrs. SARAH W. RYMER died February 10 at Mifflintown, Pa. An active member of the Huntingdon community for many years, she was the last surviving member of her immediate family. She is survived by two daughters, five grandchildren, and five great grandchildren.

Doing your own thing

Mrs. Miriam Smith Wetzel '52, national alumni association president, confers before the spring council meeting with Thomas B. Robinson '66, administrative assistant to the president and associate director of development.

The present generation of students prides itself on its view that each person "should do his own thing." The President of the Juniata Alumni Association, Miriam Smith Wetzel '52, established a reputation for doing her own thing from the first day she arrived on the campus.

It is well known among the alumni that Mrs. Wetzel was Miss Pennsylvania of 1952 and that Shirley Jones, now star of the popular TV series "The Partridge Family," was her runner-up. What is not so well known is the fact that Mrs. Wetzel was the first person to set up an authorized radio station on the campus—in Room 300 of Founders Hall directly above the present student station WJC.

Mrs. Wetzel said she earned her operators license in order to communicate with her future husband who was a student at Lehigh University. Her call letters, sent in the International Morse Code, were WN3TBE, but she now realizes that some of the 30,000 other amateurs in this country were undoubtedly listening to the conversations.

During her undergraduate days, Mrs. Wetzel was an organ student of Prof. Donald S. Johnson. She displayed her talent in the Miss America contest by playing the world's largest pipe organ in Convention Hall at At-

lantic City. Prof. Johnson recalls that the piece was "Jealousy." She was also organist at the Stone Church of the Brethren in her senior year and, of course, was a member of the Juniata choir, band and orchestra.

Winning the Miss Pennsylvania crown brought her a four-year scholarship which she applied to graduate work in journalism and music at Temple University. She served as assistant in the editorial offices of the *Ladies Home Journal* for a year before settling down to housekeeping and motherhood.

Musician and teacher

In addition to her busy life as housewife, and mother to two sons and a daughter, Mrs. Wetzel has been a full-time schoolteacher and a church organist. Presently, however, she is a part-time teacher in the Upper Darby schools but previously she taught music in the Middle School of Nether Providence School District in Wallingford.

Mrs. Wetzel's husband, Lew, is retiring as Assistant Director of Engineering for the radio and television division of Triangle Publications in Philadelphia to take a position in Maine. The family will move in June and they are looking forward to living

in the state they have visited each summer for the past fourteen years.

The Wetzels are ardent travelers and in 1968-69 visited Spain, Switzerland, Austria, Germany, the Netherlands, England, the Bahamas and Bermuda. They have also visited 45 of the states as well as Mexico and Canada.

Mrs. Wetzel has been the driving force behind efforts of the Alumni Association to offer more programs to attract alumni and friends back to the campus. A recent weekend entitled "Juniata Today" proved that alumni, faculty and students can be successfully mixed in a series of seminars.

Under her guidance, and assisted by the Alumni Council members, Mrs. Wetzel has pushed the Annual Support Campaign, the involvement of alumni representatives in the work of the Task Force on educational policy, suggested building an ice skating rink for students, started an alumni admissions committee and through the year performed her role as first woman president of the alumni association with efficiency and enthusiasm.

It takes about two hours for the Wetzel family to fly in a private plane from West Chester to their new home in Maine, near Portland. The alumni and campus friends of the Wetzels hope they will fly back often.

Mrs. Glenora Edwards Rossell '47

MRS. GLENORA ROSSELL '47 APPOINTED TO HIGH POSITION

Mrs. Glenora Edwards Rossell '47 assumed her duties last September as director of University Libraries at the University of Pittsburgh. In this position Mrs. Rossell becomes one of Juniata's most distinguished alumna.

Acting director since January of 1970, Mrs. Rossell is in charge of the system which includes the Hillman Library and the departmental libraries in the sciences, social work, East Asian languages, music and fine arts.

In a letter to President Stauffer the new Pittsburgh director of libraries said that "much of my guidance I attribute to President Ellis, Miss Lillian Evans, Mrs. Kenneth Smoke and Mrs. Sarah Hettinger. Juniata has a warm spot in my memories."

Mrs. Rossell went to Pitt as documents librarian in 1958 from Brooklyn College where she had been a librarian for five years. At Pitt she became the first librarian for the Graduate School of Business, assistant to the director of the University Libraries and acting director. As director of the Hillman Library System she will operate with an annual budget of over \$2 million and a staff of 300 full and part-time employees.

Earlier in her career, Mrs. Rossell worked in the Juniata College library, in a public school system, and as a librarian with the E. I. de Nemours du Pont & Company at the Wilmington, Delaware and Savannah River Plants.

She is a member of the American Library Association, the Tri-State As-

sociation of College and Research Libraries, the Pennsylvania Library Association and the Pittsburgh Chapter of the Special Libraries Association of which she is a past president.

She received her Master of Library Science degree from Columbia University and has done additional graduate work at Pitt and has taught at Pitt and Carnegie Institute of Technology Schools of Library Science.

FUND ESTABLISHED TO HONOR GERTRUDE BUTLER

Recognition was given to Miss Gertrude L. Butler '31, professor emerita of home economics, last spring at a special honorary tea. Organized by a committee of home economic graduates headed by Mrs. Charles Hess '48 and Mrs. Kenneth Crosby '38, the affair was attended by over 100 friends and former students of Miss Butler.

The highlight of the afternoon was the presentation of a letter to President Stauffer, establishing a special endowment fund known as the Gertrude L. Butler Fund. The home economics graduates had given more than \$1,000 to the Fund to be fully invested as a part of the permanent endowment fund with the income being used for Nursery School equipment.

The letter also stipulated that the Fund will remain open so that future contributions might also honor Miss Butler.

In addition to the endowment fund Miss Butler was given a diamond pendant necklace and an ornamental scroll bearing the names of more than 350 of her former students.

THOMAS STAUFFER MADE ADMINISTRATIVE FELLOW

Thomas M. Stauffer, the son of President and Mrs. John N. Stauffer and a former student at Juniata College, has been made an Academic Administration Fellow for 1971-72 by the American Council on Education.

Stauffer, who is Assistant Professor of Political Science at Keene State College in New Hampshire, was one of 39 Fellows selected from 94 nominees for the Academic Administration Internship Program supported by the Ford Foundation.

In the announcement of the appointment, Dr. Logan Wilson, president of the American Council on Education, explained that the intern will spend nine months on his home campus or on a host campus and is assigned to one or more top administrative officers to observe and to participate in policy and decision making activities.

Stauffer will attend a fall and spring seminar in Chicago and Washington on the problems of academic administration, undertake assigned readings, and produce an analytical report in the field of academic administration.

A student at Juniata from 1959 to 1961, Stauffer transferred to Wittenberg University where he received the A.B. (cum laude) in 1963. In 1963-64 he was in Germany where he spent some time at the Free University of Berlin. In 1964-66 he was a Graduate Fellow at the School of International Relations of the University of Denver.

In 1966-67 Stauffer taught political science at Radford College in Virginia and, after spending another year of research at the University of Denver, he went to Keene State College in 1968. He is married to the former Miss Marion Walker of Denver.

CATALOG SUPPLEMENT AVAILABLE IN JULY

Information concerning the new educational program will be available when a supplement to the regular catalogue is published late in June.

A special folder was issued in May for incoming freshmen and the same material will be incorporated in the supplement.

The differences between the former curriculum and the new program may be found on pages 6 and 7 of this issue of the JUNIATA COLLEGE BULLETIN.

William F. Berrier '60

BERRIER '60 TO HEAD HUNTINGDON CLUB

The appointment of William F. Berrier as president of the Huntingdon Area Alumni Club for 1971-72 has been announced by Mrs. Miriam Smith Wetzel, president of the National Alumni Association.

A 1960 graduate of Juniata, Berrier serves as assistant dean of student affairs and head baseball and wrestling coach at the college. He is considered one of the greatest all-around athletes in Juniata's 94-year history, and still holds a number of records which he set on the College Hill gridiron more than ten years ago.

Since graduation he has been associated with the Los Angeles Dodgers baseball farm system, and has managed teams in Florida, New York, Iowa, and Oregon. This June he will begin his third summer as manager of the Medford (Oregon) Dodgers, defending champions of the Northwest Professional Baseball League.

He is married to the former Marjorie Ross, of Harrisburg. They have two sons, William and Donald, and reside at 19th and Allegheny Streets, Huntingdon.

In his new executive capacity, Berrier will preside over two informal dinner meetings planned for this spring to attract area alumni to the college campus. The meetings have been set for the Tuesday evenings of April 6 and May 4, at 6:30 p. m. in the faculty lounge of Ellis Hall, Juniata's college center.

MISS ELDA WERTZ '09 NORMAL EDUCATION GRAD

Miss Elda Olive Wertz, 83, a graduate of the Normal English Course, Juniata College, died at her home in Johnstown, Pa., last September 13, 1970.

Miss Wertz, one of nine children in her family who graduated from Juniata, received her bachelor of education degree in 1909. She was an active alumna who frequently visited the campus and faithfully attended her local alumni club meetings.

She served the Church of the Brethren for many years as a Sunday School teacher and she helped to organize the Arbutus Church of the Brethren as an outreach program of her own Walnut Grove Church.

Miss Wertz taught in the Johnstown public schools from 1912 to 1923, the Waynesboro schools from 1923 to 1925, and in the Richland Township Schools from 1926 to 1934.

TRUSTEE EMERITA FLORENCE GIBBEL DIES

Mrs. Florence B. Gibbel, 92, died at her home in Lititz, January 21, following a brief illness. Mrs. Gibbel had been a trustee emerita of Juniata College.

She was the daughter of Jacob and Amelia (Bear) Baker and was married to the late Henry R. Gibbel '88, who served as a trustee of Juniata from 1911 until his death in 1927.

Mrs. Gibbel is survived by five grandchildren; Henry H. Gibbel '57, who is president-elect of the National Alumni Association; Mrs. George B. (Joyce) Biemesderfer '54; James C. Gibbel '60; John R. Gibbel '61; and Mrs. James (Ruth) Africa '65. Also surviving are nine great-grandchildren.

It is suggested that those who wish to do so, contribute to the Henry R. Gibbel Scholarship Fund at Juniata as a gift of remembrance and to assist future generations of students.

DR. KENNETH L. SMOKE, FORMER PROFESSOR DIES

Dr. Kenneth L. Smoke, chairman of the psychology department at Gettysburg College, a former professor at Juniata from 1938 to 1946 and husband of the former Lillian Durrer Harbaugh '31, died December 21, 1970.

Dr. Smoke, who was honored by his institution for a quarter of century of service, was college marshal. In addition to his duties at Gettysburg he was a past president of the Pennsylvania Psychological Association, of the national honorary society in psychology, Psi Chi, and a fellow of the American Psychological Association.

Dr. Smoke received his bachelor of arts degree "with distinction" at Ohio State University in 1924 and his master of arts degree the next year. He did graduate work and teaching at Northwestern University and was named assistant professor of philosophy at Gettysburg College for two years (1927-1929). He then went to Cornell for further study, taught psychology and returned to Ohio State to complete his Ph.D. in 1931.

After teaching at Mary Baldwin College in Virginia and Juniata College, Dr. Smoke returned to Gettysburg in 1946 to establish the department of psychology and become its first chairman.

In addition to his wife, who is librarian of Schmucker Memorial Library at Gettysburg College, Dr. Smoke is survived by their son, Richard, a Research Fellow at Harvard University.

PROFESSOR WRITES BOOK ON GERMAN PROPAGANDA EFFORT

German propaganda in the United States prior to Pearl Harbor is the subject of a book written by Dr. Klaus Kipphan, associate professor of history at Juniata. The work is the outgrowth of a doctoral dissertation at Heidelberg University in 1969.

Alumni Council Votes Support for Dana Campaign

The Juniata College Alumni Council, on the motion of its vice president, Henry H. Gibbel '57, passed the following resolution in support of the Charles A. Dana Matching Gift campaign. The Charles A. Dana Foundation gave Juniata \$250,000 to be matched by a similar amount for the establishment of four endowed professorships.

We, the Alumni of Juniata College, have and will return to the campus, one by one, during the long years ahead. The College will have changed, perhaps almost beyond recognition, to what we remembered. New buildings will have replaced the old familiar ones of our student days; the great trees will grow greater still; a new

breed of students, as different as we are from our parents, will greet us on the campus walks.

There will be only one aspect of our return that will touch us with a sense of familiarity. As we walk down the halls of those new strange buildings, catching a phrase through an open classroom door, each of us will recall a professor who moved us—a professor who inspired us, or cheered us, or angered us, or advised us. Each of us will have an unspoken thought of remembrance for the men and women to whom this Resolution is directed.

The kind of person who devotes his life to the instruction of youth never changes. Here is the true crea-

tor, dedicated and unselfish. The men and women of the faculty of Juniata College will leave this campus as the future continues to unfold. But many years from now they will be here again each time any one of us returns. They will travel the world with us, in our work, in our attitudes, our aspirations.

In recognition and in appreciation of the teaching faculty of Juniata College who have given so much of themselves, we, the Alumni of Juniata College, hereby resolve to give our wholehearted individual and collective support to match the \$250,000 grant given by the Charles A. Dana Foundation for the establishment of four endowed professorships.

REV. MURRAY APPOINTED NEW CAMPUS MINISTER

President John N. Stauffer announced the appointment of the Rev. M. Andrew Murray of Portland, Ore., as campus minister. He will occupy the position formerly held by the Rev. Robert E. Faus.

Murray, 28, has served since 1968 as pastor of the Peace Church of the Brethren, Portland. He will assume his duties at Juniata on September 1.

In announcing the appointment, Dr. Stauffer described Murray as one "who is responsive to the needs and interests of this student generation." He added that "it is a particular pleasure to bring to the campus a young man who is so committed and vital a person."

According to Dr. Charles W. Schoenherr, dean of student affairs, Murray had been interviewed by Juniata students and faculty last summer and was offered the position at that time.

The dean commended Rev. Murray on "his willingness to explore new ways and new approaches to age-old problems and questions" and added that the entire college community will

look forward to his arrival in September.

For the past year a cooperative arrangement with the St. James Lutheran Church and the United Presbyterian Church of Huntingdon has provided ministerial and counseling services for students during the interim period when the college was without the service of a campus minister.

PLACEMENT OFFICE ASKS FOR ASSISTANCE

Director of Placement, Ronald Shunk, reports that the 1971 interviewing and recruiting operation has come and gone and his talks with recruiters has reaffirmed the opinion of many "experts" concerning the tight job market.

Shunk said there has been talk of a twenty-five percent reduction in the hiring market for this year's graduates and that seems to be close to accurate for Juniata. In fact, he said, his office has had slightly more than twenty-five percent cancellations among recruiters.

Shunk is appealing to alumni, at the suggestion of the Alumni Council, to let him know about any job which

could be referred to a senior. Anyone with information to share should feel free to contact the Placement Office.

Juniata, he said, has a number of well qualified graduates in many areas; education, biology, psychology, business and the social sciences are the major areas of the seniors who are still seeking employment. Helpful hints will be appreciated.

MORSE '34 RECEIVES NEW BRETHREN ASSIGNMENT

Kenneth I. Morse '34, editor of the *Messenger*, the official publication of the Church of the Brethren, has been given a new assignment as director of print services.

The action was taken by the General Board to centralize the communications units in the Elgin offices. Morse has served as editor for 21 years and been on the staff for 28 years. In 1951 Juniata awarded Morse the honorary degree, Doctor of Letters, in recognition of his editorial work.

Morse is the father of two recent Juniata graduates, David '65 and Paul '67.

Juniata College Alumni Council Nominees 1971-1972

TRUSTEE—One for a three-year term

Dr. William N. Maclay '47

Currently Vice President and Director of Research of Koppers Company, Inc., Pittsburgh, Dr. Maclay has served in various research capacities of the company. He is a member of the American Chemical Society and is a Fellow of the American Institute of Chemists. He received the Ph.D. degree from Yale University in 1950.

While at Juniata, Dr. Maclay was president of the student senate, played varsity basketball, and was a member of the college choir and band. He received his B.S. degree Magna Cum Laude, and was the recipient of the Brumbaugh Science Prize and the Judy Literary Prize. He was a member of the Honor Society, having achieved Dean's List status all four years.

Dr. Maclay's alumni activities include serving as Chairman of the President's Development Council; Pittsburgh Area Chairman of Phase I, Margin of Difference Campaign; past president of the Pittsburgh Area Alumni Club; and past class fund agent. In addition to his professional interests, Dr. Maclay is active in church and community affairs. He is an Elder and Deacon in the United Presbyterian Church and is a member of the Advisory Committee of Allegheny County Community College.

He is married to the former Betty Boucher '46, and has five children, the oldest of whom is a Juniata sophomore.

George L. Weber '40

As part of a recent major marketing change, Atlantic Richfield selected Mr. Weber to head its commercial and home heat operations in three new zones covering the 16-state Eastern Marketing Area. Formerly, he served in numerous management positions. Mr. Weber is also president of Patroon Fuels, Inc., an Atlantic Richfield subsidiary in New York. He is a director of the National Fuel Institute and has been a recipient of the Gold Award from the American Petroleum Institute.

While at Juniata, Mr. Weber was co-editor of the 1940 Alfarata, Indian editor, football captain, basketball captain, and trackman on championship teams at the 1938 and 1939 Penn Relays. During his senior year, he won the Hyatt Athletic scholarship Cup.

As an alumnus, he has served as president of the Up-State New York Alumni Club, and he has worked in various development campaigns. In 1965, Mr. Weber was nominated by Juniata for Sports Illustrated Silver Anniversary All American. Mr. Weber is active in church and community affairs.

He is married to the former Mary Heller '40, and has three children.

PRESIDENT—One-year term

Henry H. Gibbel '57

Serving as Vice President of the Juniata Alumni Association during 1970-71, Mr. Gibbel is President-elect for 1971-72 as outlined in the Association's Constitution.

Working in the insurance business since graduation from Juniata, Mr. Gibbel is Vice President, Secretary and Director of Lititz Mutual Insurance Co., in Lititz, Pa.

Mr. Gibbel's alumni activities include serving as past-president of the Central Pennsylvania Alumni Club, 1957 Class Fund Agent, and a member of the Alumni Council. He is a member of the President's Development Council, and is Chairman of the Dana Matching Gift Committee.

He is married to the former Joan Reist and they have three children.

VICE PRES.—PRESIDENT ELECT—One for a one-year term

Robert M. Keim '52

Since receiving the J.D. degree from Dickinson School of Law in 1956, Mr. Keim has been practicing law in Somerset, Pa., and

is associated with the firm of Livengood, Braucher and Keim. In addition to his professional interests, Mr. Keim serves on the General Board of the Church of the Brethren, is secretary of the Historical Society of Somerset. He is a past president of the Somerset Alumni Club. He is married to the former Shirley Sanner, and they have six children, the oldest of whom is a freshman at Juniata.

Francis W. Zimmerman '54

Having served in various capacities with the Bell Telephone Company, Mr. Zimmerman's current title is Supervisor of System Service and Support Data Processing. He is active in community and church affairs and is a past president of the Philadelphia Alumni Club. Mr. Zimmerman currently serves as Fund Agent for the Class of 1954. He is married to the former Shirley Nell '52, and has one daughter.

COUNCIL MEMBER-AT-LARGE—Three for a three-year term

Dr. Peter A. Christie '62

A research chemist with Armstrong Cork Company, Dr. Christie received his Ph.D. from the University of Delaware in 1967. He is married to the former Millicent Luck '61.

Richard C. Coffman '50

After receiving his B.S. degree, Cum Laude, from Juniata in 1950, Mr. Coffman has served in various capacities with the C. H. Miller Hardware Co. in Huntingdon, Pa. Currently, his title is Vice President and General Manager. He is married to the former Kathleen Kepner of Pittsburgh, and they have one daughter.

Mrs. Manuel (Beverly Rinehart) Darkatsh '59

Mrs. Darkatsh is a homemaker, and former teacher, serving until recently as Assistant Professor of Education at Glassboro (N. J.) State College. She received her M.A. degree from Teachers College, Columbia University in 1962. The Darkatshs have one son.

Mrs. Richard (Janet Claycomb) Dodge '55

A fourth grade teacher from 1955 to 1961, Mrs. Dodge is now a housewife and mother of three children in Harrisburg, Pa. Her interests outside the home include serving as executive vice president of Neighborhood Day Care Center, Inc.

Gary C. Horner '64

Having received the J.D. degree from Dickinson Law School in 1967, Mr. Horner is an attorney now affiliated with the firm of Spence, Custer, Saylor, Wolfe and Rose in Johnstown, Pa. He is married to the former Ann Wolfe and they have one son.

Roy H. Rollman '55

After serving several years with the Bendix Corporation, Mr. Rollman is currently Manager of Data Processing with the Susquehanna Broadcasting Company. He is married to the former Barbara Grim '55, and they have one son.

Dr. William J. West '56

Having received the M.D. degree from Jefferson Medical College, Dr. West is a physician in Carlisle, Pa. He is married to the former Joyce Warfel '56, and they have three sons.
